We published the abovementioned article about probiotic mixture VSL#3 on October 6, 2021. Since the product was named VSL#3 in our purchasing process in early 2016, it is referred to as VSL#3 in our article. In addition, the product currently known as VSL#3 is not the same as De Simone Formulation. De Simone Formulation is now available as Visbiome® in the United States and Vivomixx® in Europe.
