Supplementary Material 1.

Suppl. Mat. 1 – Fig. 1. (below).

Delta K values for different numbers of populations assumed; K values ranging from one to six.

![Graph showing Delta K values for different K values ranging from 2.0 to 5.0.](image)

Suppl. Mat. 1 – Fig. 2. (next page).

Sliding-window averaged FST values between pigs and wild boars. A 5-SNP sliding window-averaged pairwise FST values were plotted against centered genomic positions of the windows. Threshold line marks top 1% of observations with FST above 0.426.
